## New Hanse 360 Impressive Dimensions at 36 Feet

**Greifswald:** With the new Hanse 360, the world's second largest manufacturer of sailing yachts presents the most compact model in the successful new series from its collaboration with the yacht designers at Berret-Racoupeau. With her exceptionally high volume at 36 feet in length, her well thought-out layout options and her wide range of customisation options, she is in a class of her own.

The distinctive design of the Hanse 360 with the typical Hanse chines not only ensures stability and performance, but also, as with her larger sisters, an enormous amount of space and thus an unusually high level of comfort in this class. Luxurious extras such as a BBQ and a refrigerator in the cockpit, extended cooling capacity below deck or a second separate bathroom in the owner's cabin make the Hanse 360 unique.

Like all Hanse yachts, the Hanse 360 stands for fast cruising and easy sailing. All lines are led to the helm station, making the yacht not only safe and comfortable, but also suitable for single-handed sailing, as is standard with Hanse. The optional bowsprit enables extended sailing options and therefore more power for the yacht on the water. The optional performance rig with a larger sail area enables a further increase in performance.

The new Hanse 360 will celebrate her world premiere at the Cannes Yachting Festival in September 2024.

**Hanjo Runde, CEO of HanseYachts:** " The Hanse 360 is a logical extension of our newly designed current model series and a space miracle at 11 metres in length."

### Highlights

**Hull:** The hydrodynamic design with a slim waterline ensures a high hull speed. The chines at the front and rear also create a wide hull and thus the maximum possible interior space.

**Deck:** The well-designed helm station with optional folding seats gives the helmsman full control of the Hanse 360 in every situation. All lines and winches can be operated from here and all information comes together here. The optional secondary winch on the coaming allows the flying headsails to be trimmed perfectly.

The Hanse 360 offers a perfectly accessible and easy-to-open storage space in the cockpit behind the helm position for various standard liferaft models.

# PRESS RELEASE

The Hanse logo features the brand name 'Hanse' in a white, elegant script font, followed by a stylized white wave icon.

Thursday, 27 June 2024

The owner can choose between a classic and functional cockpit table made of stainless steel or a designer table made of GRP with an integrated stainless steel refrigerator. The optional BBQ at the stern is positioned at the perfect ergonomic height so that it can be operated from the bathing platform. When closed, it provides additional seating.

**Rig:** The large and sporty rig of the Hanse 360 with generous sail areas of 66 square metres upwind and 169 square metres downwind emphasises the yacht's performance potential. The optional bowsprit with its integrated anchor arm serves as a forward attachment point for a gennaker or crossover. Optional electric winches are just as much a part of the Hanse-typical easy handling as the obligatory self-tacking jib. The Hanse 360 can also be equipped with a performance rig, featuring a square head mainsail with an additional 6 square metres compared to the standard mainsail. As a particularly environmentally friendly option, high-performance SPS Sustainable Performance Sails from Elvstrøm are available, made predominantly from recycled materials.

**Interior:** The intelligent arrangement of up to 16 opening hatches and windows ensures maximum light and ventilation below deck.

With 12 possible layout combinations, the Hanse 360 can be configured entirely according to personal requirements. The large owner's cabin is available with its own bathroom on request. In the aft cabin, you have the choice between two comfortable cabins or an aft cabin and a large storage space.

The spacious saloon offers space for up to eight people at the large table, which is available in two different versions. The spacious L-shaped galley also leaves nothing to be desired. Depending on the layout, a maximum of two extra fridges provide up to 192 litres of additional cooling capacity. A navigation table is of course also available.

A special upgrade for the Hanse 360 is the Flagship Package with, among other things, high-quality leather handrails, more luxurious upholstery and additional reading lights.

## **Recommended retail price (basic version)**

EUR 185.900 (exkl. MwSt.)
